

International Organization for Migration (IOM)
The UN Migration Agency

Vacancy for external candidates

Vacancy number	VN #BLR/2024/05
Position	Consultant on conducting regional trainings for health professionals on improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants
Duty station	Minsk, BELARUS
Classification	Consultancy contract, Category B
Contract type	Part-time, 40 working days
Application deadline	March 20, 2024

Established in 1951, IOM is a Related Organization of the United Nations, and as the leading UN agency in the field of migration, works closely with governmental, intergovernmental and non-governmental partners. IOM is dedicated to promoting humane and orderly migration for the benefit of all. It does so by providing services and advice to governments and migrants.

IOM is committed to the principles of diversity and inclusion. This position is available to external candidates.

Description:

The project “Belarus: Supporting National Capacities in Migration Health Focusing on Communicable Diseases” aims to support the Government of Belarus in preventing communicable diseases among migrants in Belarus and aligning national migration health policies and programmes with empirical data and best international practices. The Ministry of Health of Belarus has expressed interest in improving vaccination uptake among migrants (adults and children) regarding vaccines included in the National vaccination plan. The results of the study on migration and health, conducted by IOM within the framework of the project in 2022-2023, show that vaccination uptake among migrants and adherence to vaccines among migrants in Belarus is low. More than 20% of the respondents report that they do not believe that vaccines work; about 20% say that they are not sure in vaccines quality, and there can be adverse events after vaccination; about 10% say they are afraid of

any vaccines. Also, about 40% of migrants do not have any medical files or documents containing information about their health statuses, including notes on vaccinations for children. To address existing gaps in vaccination, guidelines for health professionals on improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants need to be developed, approved and disseminated. It is expected that these guidelines will be used both as practical guidelines and as teaching materials for post-graduate education of health professionals in Belarus. The guidelines will be complemented by the organization of 5 (five) 1,5-day regional trainings/workshops on improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants in 5 regional city centres of Belarus.

To enhance the awareness of migrants themselves on the importance of vaccination and foster vaccine confidence, informational materials on the promotion of vaccination among migrants will be developed to inform an informational campaign. This campaign aims to inform migrants, social workers and civil society organizations on the importance of vaccination for migrants, improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants.

Core functions / responsibilities:

- Based on the guidelines on vaccination and with the support of Consultant on developing guidelines and information materials, Consultant will develop an agenda, training materials, hand-outs , pre- & post-evaluation forms and conduct five regional 1,5-day trainings for health professionals on improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants, including facilitation of discussions, group work, Q&A sessions, etc. · Based on the analysis of the pre- & post-evaluation forms and expert observations, the Consultant will draft a training report identifying needs for further capacity development activities if any and other relevant recommendations .
- Consultant will provide assistance to Consultant on developing guidelines and information materials in developing a needs assessment report, including a stakeholder analysis and desk review of the national regulatory and structural frameworks of vaccination arrangements in Belarus.
- Based on the needs assessment report, Consultant will provide assistance to Consultant on developing guidelines and information materials in developing guidelines for health professionals on improving vaccination uptake, addressing vaccine hesitancy and fostering vaccine confidence among migrants.
- Consultant will provide assistance to Consultant on developing guidelines and information materials in producing informational materials and supporting the design of an informational campaign focused on promotion of vaccination among migrants.

The above activities will be delivered in close coordination with the Senior Project Assistant. The language of the products to be developed (guidelines, needs assessment report, informational materials and trainings' teaching materials) is Russian.

Required Qualifications and Experience:

- ✓ MSc in Public Health, Social Sciences, or related discipline;
- ✓ At least 5 years of work experience on public health, preferably on migrant health among migrants in the CIS countries;
- ✓ Proven experience of developing and delivering training modules;
